# GREEN ROOF MAINTENANCE

---

## Do you have a green roof?

Your green roof is a living, breathing organism! Have you given it the care it needs to thrive? There is no such thing as a no-maintenance green roof.

## When it comes to green roof maintenance, we can do it all!

While green roofs are generally considered low maintenance landscapes, they do require specialized care at regular intervals, especially during the establishment period. Garden-like green roofs will require a level of maintenance comparable to street level landscapes. Let **ecospaces** help keep your green roof healthy and vibrant!

## SERVICES
